Applicant's arguments have been fully considered and have been found not persuasive.

It is noted that Applicant's main arguments are directed toward the limitation of "Wrapping signaling messages" as recited in claims 1 and 10. The Examiner believes that this limitation is obvious in the Turner reference because this limitation basically reads on ending the session with the first communication network and establishing another session with a second communication network. One of an ordinary skill in the art may choose the "wrapping signaling" to use any techniques in the art of telephony such as, sending signal or message or any other method of alerting the termination of the first session and establishing another session. Thus, the Examiner considers this feature obvious and well known in the art.
